PROFESSIONAL SUMMARY

Results-driven DevOps and Cloud Engineer with 6+ years of experience in AWS cloud infrastructure, Kubernetes, Terraform, Docker, CI/CD automation, Linux administration, and Infrastructure security. Experienced in building scalable, highly available, secure, and cost-optimized cloud-native environments using AWS ECS, EKS, Jenkins, GitHub Actions, and Infrastructure as Code practices. Strong expertise in deployment automation, monitoring, system reliability, and production infrastructure management.

TECHNICAL SKILLS

Cloud Services: AWS (EC2, ECS, EKS, VPC, IAM, Route53, S3, Lambda, RDS, CloudFront, CloudWatch, ACM, ELB, Security Hub)

Containerization & Orchestration: Docker, AWS ECS, Docker Swarm, Kubernetes

Infrastructure as Code: Terraform

CI/CD & Automation: Jenkins, GitHub Actions, Ansible

Version Control: Git

Scripting: Bash, Python

PROFESSIONAL EXPERIENCE

System Engineer | TCS | 2025 – Present

- Architected and managed enterprise-grade AWS cloud infrastructure and Amazon EKS environments, improving cluster availability to.
- Automated infrastructure provisioning using Terraform and Jenkins, reducing environment setup time by 50%.
- Supporting deployment optimization, reliability improvements, and operational automation.

DevOps Engineer | CCS Technologies Pvt Limited | 2024

- Worked on enterprise cloud infrastructure management and deployment automation activities.

Sr. DevOps Engineer | Nubnix Technologies Pvt Limited | 2024

- Designed a high-availability AWS ECS Fargate infrastructure, reducing overall cost by 35% for currency comparison application.
- Implemented CI/CD pipelines for automated application deployment and release management.

Sr. DevOps Engineer | Crozaint Technologies Pvt Limited | 2023 – 2024

- Orchestrated containerized applications using AWS ECS for scalable deployments and infrastructure management.
- Implemented Infrastructure as Code using Terraform to standardize and automate cloud provisioning.
- Optimized cloud resource utilization, slashing overall AWS infrastructure spend by 50% through cost-allocation implementations.
- Collaborated with development and QA teams to streamline deployment and DevOps workflows.

Associate I - Analyst Cloud & DevOps | FutureBlox Technologies Pvt Ltd | 2022

- Developed and maintained CI/CD pipelines using Jenkins and GitHub Actions.
- Managed AWS and Azure infrastructure for development and production environments.
- Implemented monitoring and alerting solutions using Zabbix, Wazuh, and New Relic.
- Automated operational tasks using shell scripting and Docker containerization.

L2 Server Engineer | HashRoot Technologies Pvt Ltd | 2021 – 2022

- Managed Linux server administration, troubleshooting, monitoring, and backup operations.
- Automated operational tasks using Bash scripting and monitoring tools.

Server & Network Administrator Trainee | Spices Board | 2020 – 2021

- Configured LDAP authentication, Apache/Nginx web servers, and automated backup tasks using Ansible and shell scripting.
- Managed MySQL/MariaDB databases and implemented server hardening practices.

Linux Administrator cum Trainer | Spectrum Softtech Solutions Pvt Ltd | 2019 – 2020

- Delivered training sessions on RHCE 7 and AWS Solutions Architect technologies.

PROJECTS & ACHIEVEMENTS

- Built highly available and secure AWS ECS Fargate infrastructure for financial and money transfer applications.
- Implemented blue-green deployments using ECS, ALB, and Fargate for zero-downtime application releases.
- Developed Terraform VPC modules with public/private subnet architecture and route table associations.
- Automated Docker image build and deployment pipelines using Jenkins and Ansible.
- Hosted secure static websites on Amazon S3 with CloudFront without enabling public bucket access.

EDUCATION

B.E. Computer Science and Engineering – Dr. Paul's Engineering College, Pondicherry (2018)
